

SG 5040 TURBOLUX

NEW. Our fastest non-contact coiling door with maximum transparency

HÖRMANN

SG 5040 TurboLux

Non-contact coiling door with maximum transparency

With an opening speed of up to 138 inches (11.5 feet) per second, Hörmann innovation brings you the fastest coiling door in the world. Fast opening minimizes operating costs by reducing wait times at the door and speeding up logistics processes.

The high-speed door has a transparency of approximately 90% of the door curtain. Impact-resistant polycarbonate sections are very robust withstanding the demands of rough, everyday industrial use.

Thanks to its particularly powerful internal springless drive and very narrow side guides, Hörmann's new high-speed door requires just under 11" for side clearance. The new operator guarantees a service life of more than 1,000,000 cycles. This significantly reduces maintenance costs, since experience has shown that the springs must be replaced every 100,000 cycles. This means that the SG 5040 TurboLux is almost completely maintenance free.

The safety light curtain, integrated in the side guides, continually monitors the closing of the door up to a height of 8'-2" and meets the safety requirements of UL 325.

Equipment Specifications

SG 5040 TurboLux Non-contact Coiling Door

Door Size	
Maximum Width	16 feet
Maximum Height	16 feet
Door Speed	
Opening Speed	Up to 138 inches per second
Closing Speed	Up to 37 inches per second
Door Construction	Impact-resistant polycarbonate sections with aluminum profiles
Height of Section	21 inches
Counterbalance	
Standard	Counterweights - safely hidden in left and right side guides
Emergency Opening/Closing	
Standard	Emergency hand chain
Optional	Quick automatic emergency opening via an emergency handle
Color Options	
for Polycarbonate Hood and Door Sections	Standard: Clear Optional : Dark gray, blue, red

Quick and cost-effective assembly
The pre-assembled door header saves you time and money!

Hörmann Innovations
This door is 90% transparent

Opening speed of nearly 12 feet per second!

Unlike our competitors, the innovative frameless design of Hörmann's polycarbonate sections allows us to achieve a total height of 21 inches per section. This provides a maximum transparency of 90%!

We reserve the right to change specifications without notice. ©Hörmann (Issue 09.2026)
