

High-Performance Rubber Doors

Door Solutions Design Guide

Tough and reliable for your challenging environments

HÖRMANN

Equipment Features

● = Standard

○ = Optional

— = Unavailable

Door Model

Suitable Application

Maximum Size Range (ft)

Operating Speeds

Maximum Opening Speed (in/s)

Approximate Closing Speed (in/s)

Minimum Required Headroom (in)

Minimum Headroom, doors up to 17 ft high (in)

Minimum Headroom, doors over 17 ft high (in)

Panel

Windlocks

Curtain Lok™

Wind Load Protection - weighted bottom bar is standard on door width ≥ 12 ft (optional on door width < 12 ft)

Resistance to Wind Load - Closed Position

In-plant only

Breakaway

Material

1/4 in (6 mm) thick EPDM rubber (Blue or Grey)

1/4 in (6 mm) thick MSHA self-extinguishing rubber (Black only)

Thermal Insulation

Imperial units = BTU/(hr x ft² x °F)

U-value - Imperial value (Metric value) Metric units = W/(m² x K)

Vision Windows - 16 in x 16 in Maximum 1 window every 5 ft of door width

Construction

Hood - Galvanized Steel

Hood - Stainless Steel

Guide Tracks (in)

Protection Device

Warning Device - LED Lite Advance traffic light strip(s)

Operation

Drive

Counterbalance 100K cycle springs for door height < 22 ft

Counterbalance 50K cycle springs for door height ≥ 22 ft

Electrical Requirements

Control Box

Emergency Opening

Hand Crank

Chain Hoist

Warrenty

High-Performance Rubber Models

Built on a legacy

Built on a 20-year legacy started by TNR Industrial Doors, Hörmann is proud to offer our HD SERIES rubber doors as solutions for the harshest, most demanding door openings. Design fundamentals have been the key to success and are now carried forward into the latest rubber door models that Hörmann offers.

Rubber doors were first introduced to the mining industry. Since then, they have become a staple in other extremely rugged applications such as pulp and paper operations, transportation and railway service, parking and waste management. Other applications for rubber doors include parking garages and blast freezers.

Models for Extra-Large Door Openings

The extra-large, model HDXL rubber doors are available up to 47 feet wide or 45 feet high.

Our standard SBR flexible rubber curtain withstands large pressure differentials caused by wind and HVAC equipment on the extra-large door surface area.

The model HDXL9 is bigger, heavier, and stronger than all other rubber doors with components such as: 6" guides instead of 5"; 8" x 6" steel tube for mounting instead of steel angle; and a heavier 8" tall steel bottom bar construction further strengthened with ribbed aluminum extrusion reinforcements.

Patented Pivoting Bottom Bar

In addition to effectively closing extremely large openings, our patented pivoting bottom bar assembly allows the bottom bar to pivot when the curtain is exposed to high wind load or positive pressure. The door easily cycles without binding in the guides.

Smart Options

Heavy-duty EPDM rubber curtain, epoxy paint, and stainless steel fasteners are recommended options for corrosive areas like composting and waste management facilities. Our WideScan laser sensor is a reliable, modern activation with fewer false activations than motion or presence sensors, photoeyes, or ground loops.

HÖRMANN NORTH AMERICA

Sparta, TN - North American Headquarters / Sectional Doors

SIX PRODUCTION PLANTS, ONE FAMILY

As one of the world's leading manufacturers of door and dock systems, we're committed to providing the best quality, value, and selection. Whether residential, commercial or industrial, we have the solutions you're looking for. Each Hörmann product gives you the perfect array of benefits and options to satisfy your customers.
